ETI's Rugged Reliable Tactical Power® Products

Energy Technologies' (ETI) products are the standard in rugged, high-reliability power conditioning for the defense, industrial, medical and telecommunications sectors. These modular products are in use around the world including Intelligent UPS, Power Inverters, PDUs, Power Conditioners, Frequency Converters, Portable Generators, Solar Power, Fuel Cells, Computers, Tactical shelters and Peripheral Equipment.

ETI offers a wide range of products, but this site focuses on our TacticalPower® line. The rugged TacticalPower Series of power conditioning, generating, cooling & computing products are readily deployable worldwide, quickly providing the Warfighter with dependable computer-grade power or medical-grade power for triage in the field.

Tactical Inverters®: Unlike other power inverter solutions, the TacticalPower true sinewave inverters are self contained and can be quickly setup in the field without any tools. Standard NATO or Anderson Slave cables allow quick connection to any First Response Vehicles bringing AC online in less than 2 minutes.

Tactical Generators®: Unlike most generators, these light weight, Tactical Generators® produce computer grade AC or DC power. In addition, most of these units are designed to use jet (JP-8, JP-5) and diesel (DF-1, DF-2) fuels. These fuels are usually more readily available in the field. Tactical Power Plant® versions combine the benefits of the generator, ups and ATS into a single deployable package.

Global Tactical UPS® & Power Conditioners: Designed to be deployed anywhere in the world, where some form of local AC power is available, ETI's global UPS and power conditioners convert any world voltage and frequency into clean, true sinewave 50, 60 or 400 hertz AC power; allowing computer and communications equipment to be reliably used anywhere in the world. Optional battery modules convert our power conditioners into full featured UPS increasing the overall power availability even during severe power sags and interruptions. Global UPS units provide highly reliable AC and/or DC computer grade power. Some models can also derive power from vehicular DC.

Power Distribution Units: come in all shapes and sizes to meet ETI's customer requirements. Features range from simplistic to sophisticated intelligence, from local control to remote control, from commercial-off-the-shelf (COTS) to entirely custom.

Portable Solar Power: These light weight, portable solar power products produce computer grade DC and/or AC power. The Tactical Solar® line includes rugged solar panels, solar charge controllers, battery chargers/eliminators and solar UPS units in several power ratings and configurations.

Each of the Tactical Inverters, Power Conditioners and UPS is available in a variety of sizes and configurations from the light weight Tactical Briefcase™ versions which can operate one or more sets of computer and communications gear; up to the higher capacity Tactical Rack™ transit case versions.

Tactical Environmental Control Units (TECU): are available to meet your cooling needs. Built into rugged enclosures, our portable rugged air conditioning systems will keep your vital electronics cool, hot, or humidity-free enough to function!

Transportable Computers: ETI's Transportable Computing solutions will allow you to continue your vital work in the field. These products are designed to reliably operate in harsh environments from multiple AC or DC power sources, internal long duration batteries, or even solar panels.

Tactical Office: A complete office system that provides the conveniences of a modern office packaged to be deployed at a moment's notice anywhere in the world. The system is comprised of various modules that can be configured to meet the specific needs of the application.

Tactical Fuel Cells®: operate on hydrogen and oxygen to provide clean, efficient electrical power with only water and heat as byproducts. ETI's Fuel Cell Power Plant (FPP) can address global inputs and global outputs allowing it to be deployed anywhere in the world and used with any electronic equipment.

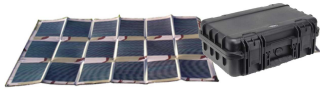

Cables & Accessories: ETI offers various cables and accessories for your TacticalPower units.
